

ARGOSY.
LEGENDARY.

FREIGHTLINER®

POWER, PERFORMANCE AND PLEASURE.

The brilliant and legendary Freightliner Argosy stands alone as one of Australia's leading freight specialist.

Behind its spectacular appearance, the Argosy has been designed to be everything you want.

It's got durability built into every aspect.

It's a powerful road warrior which will work for you day in, day out, even in the toughest conditions. It's high performance and low maintenance ensures you get the best result of every load. And it's a sheer pleasure to drive with a spacious and safe cabin that will leave you feeling great at the end of a long haul.

Versatile, efficient and with a light tare weight, the Freightliner Argosy is available in 6x4 and 8x4 versions and can be rated up to 140 tonnes GCM (upon application approval).

With the choice of the very best North American engines – Detroit's DD15 or Cummins X15 – you get high horsepower, great fuel efficiency and recognised reliability.

Delivering up to 600 hp and 2050 lb-ft of torque, all the engines are fully ADR80/03 compliant and all are easily controlled with the combination of Eaton's new UltraShift automated transmission and Freightliner's SmartShift™ automated shifter.

At 1650 inch², the massive single radiator is the biggest ever in an Argosy and it forms the heart of a new high-efficiency cooling system. Intense testing has shown it can easily handle the worst Australia can throw at it and still have plenty in reserve for bull bars, insects and heatwaves.

This truck is designed to deliver durability. The electrical architecture has been redesigned to minimise the effects of wear and tear on circuitry and help keep you on the road even longer.

Exceptionally aerodynamic with a sloping 24° windscreen, the Argosy's high-strength cabins all meet Europe's stringent ECE-R29 standards but are lightweight to allow you to carry more freight.

Available in 90", 101" and 110" raised roof, the Argosy's cabins provide drivers with all the comfort and safety they deserve and expect (please note: 8x4 is only available with 90" cab).

Freightliner's legendary swing out stairs, flat floor and plenty of headroom make the Argosy a fantastic work environment. It's only made better with an ergonomic dash, burl wood grain and ivory gauges, fully adjustable steering column, ample internal storage, panoramic views, and a sleeping area with bunks up to 51" wide.

The brilliant and legendary Freightliner Argosy. The only one to buy. The only one to drive.

WORLD'S BEST WORKPLACE.

Blending space, comfort and design efficiency, the new Freightliner Argosy has cabins that are both incredibly user friendly with open living areas and reassuringly safe.

From the moment you enter via the unique swing out stairs, these cabins will feel like a home away from home and provide exceptional driver comfort whichever one of the four options you choose:

- 90" mid-roof
- 101" mid-roof
- 110" mid-roof
- 110" raised-roof for 2-up sleeping

With up to 6'7" of headroom and a completely flat floor, the Argosy's cabins are truly walk-through, and once you sit down the new air suspended seats offer comfort and lumbar support across an array of positions.

The ergonomic cockpit with low-line dashboard provides superior visibility through the aerodynamic windscreen, and with Freightliner's SmartShift™ automated shifter mounted on the fully adjustable steering column you can change gears with your hands on the wheel and your eyes safely on the road.

Aerodynamic side mirrors are electronically adjustable and heated, with spotter mirrors and passenger down-view mirrors.

There are clever storage compartments wherever you look, and external locker boxes can be accessed from inside the cabin.

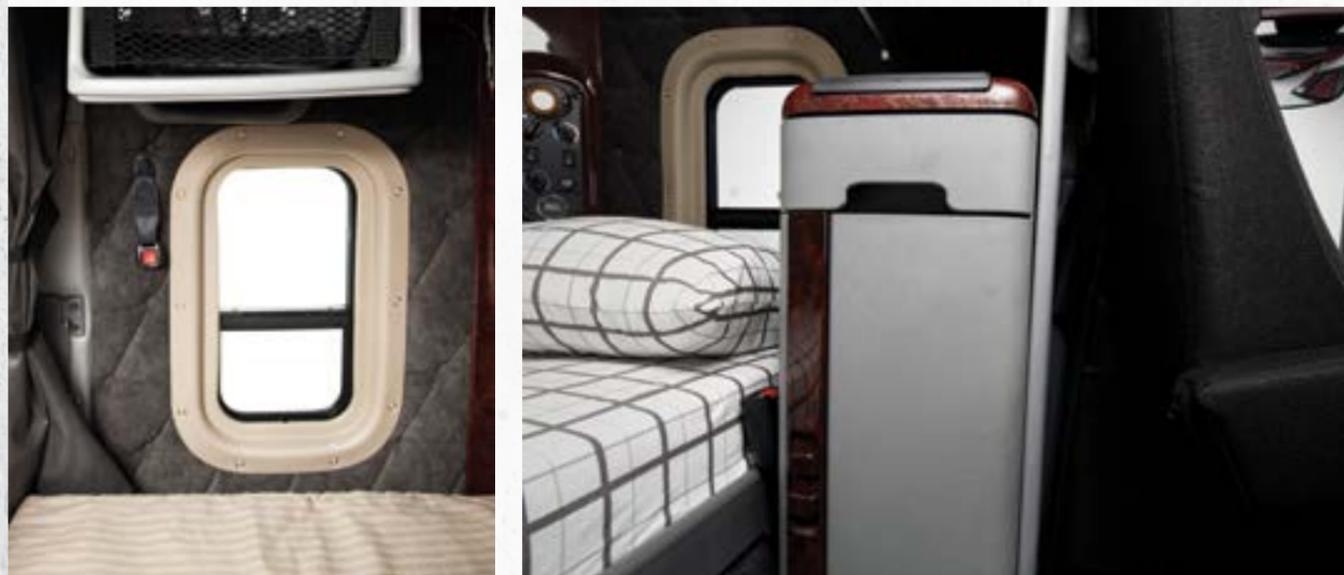

Dash components are completely injection moulded, with timber look furnishings and ivory gauges.

After a day on the road you can walk into your roomy bedroom and enjoy bunks that are up to a luxurious 51" wide. Privacy curtains keep out the light and sound-deadening material keeps out the noise.

And a high-performance airconditioning unit will keep you comfortable, day and night.

Of course, safety is always a priority. Built from heavy duty aluminium with a semi-monocoque safety cell design, Argosy's cabins are lightweight but strong, easily achieving the strict European ECE-R29 safety standard.

The Argosy dash has also been enhanced with our new locally designed dash pad and insulation package.

POWER – YOU CAN TRUST.

A great truck has to have great power. That's why Freightliner's New Generation Argosy comes with the choice of the best engines from two of North America's best engine manufacturers.

It's power you can trust.

Detroit Diesel's all new groundbreaking DD15 provides up to 560 hp and 1850 lb-ft of torque.

The new X15 available with up to 600 hp and torque of up to 2050 lb-ft.

Lots of power. Bigger loads. Easier driving.

All are fully ADR80/03 compliant.

To get all that power onto the road, the Argosy offers Eaton's new UltraShift Plus transmission with Electric Clutch Actuation and intelligent shift selection software which helps perfect launch and shift decisions.

A Hill Start Aid prevents rollbacks to make life easier and safer for even the most inexperienced drivers.

Beyond cool.

Freightliner's engineers have left nothing to chance, giving the New Generation Argosy a truly exceptional cooling package.

Big, effective and robust, it can handle anything so this truck will keep working and keep earning.

It starts with the massive 1650 in² high-efficiency single aluminium radiator – Argosy's most efficient ever - but it goes much further.

A specially-designed 11 blade fan, a more efficient charge air cooler, a new air conditioner condenser and a large capacity

header tank all add to the Argosy's incredible ability to keep itself cool. We've even adjusted the cabin height and designed a new front firewall to optimise air flow past the engine bay, to give the engine the coolest possible working environment.

With plenty of reserve capacity to handle bull bars and more, the Argosy's unbeatable cooling package has proven itself in the world's hottest deserts. This truck will stay cool – and so will you.

WIRED FOR LIFE.

We've redesigned the electrical architecture in the Argosy – minimising circuitry wear and tear to keep your truck out of the maintenance yard. Everything has been addressed, from the batteries through to the high speed diagnosis connections.

All high current power cables are routed in conduit from start to finish and Freightliner's latest eRail technology has allowed us to move cabling away from the crowded engine bay to further protect the wiring looms.

A new centralised PowerNet Distribution Box manages all electrical requirements between chassis and cabin for vastly minimising circuitry wear and tear.

From the batteries housed in a temperature sealed carrier, through to the Leece Neville brushless 185 amp alternator, to the latest technology headlights, the Freightliner Argosy is wired for life.

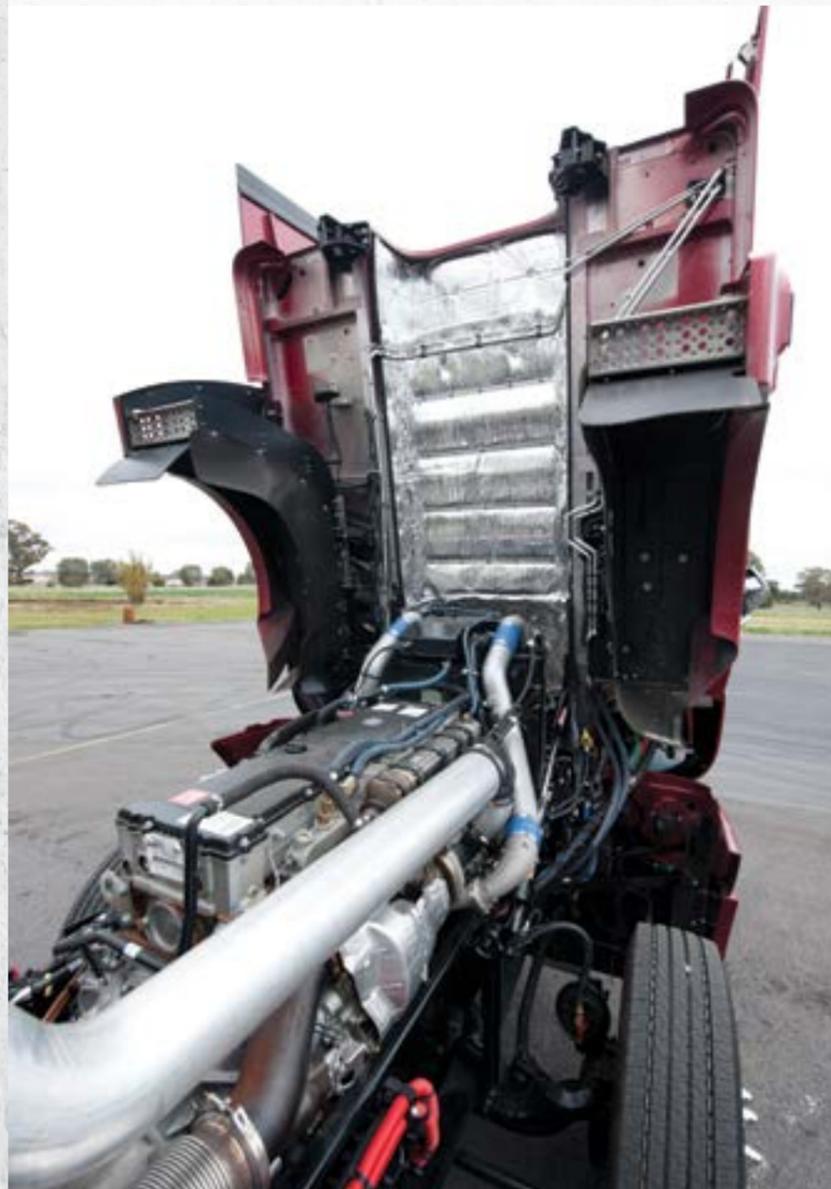

Maintenance.

We hate downtime as much as you do, so we've designed durability and ease of maintenance into every aspect of the Argosy.

The giant grille tilts up to 120° so drivers can easily access daily check points. The cab itself tilts through 75° thanks to an effortless 'electrical over hydraulic' tilt function. With complete access to the engine, jobs that could take hours only take minutes.

Coming as standard on the Argosy, Meritor's Permalube drivelines are maintenance free and their large, high capacity, front axle wheel bearings are designed to keep you on the road longer.

Of course, with a Freightliner you also benefit from having 45 specialist service and parts authorised dealers right across the country.

PASSING EVERY TEST.

Built not just to survive, the Argosy has been tested like no other to ensure it will thrive no matter what you throw at it.

Configured as a fully loaded B-double or road train, the Argosy has cruised through dynamic testing in temperatures averaging 46°, repeatedly driving up 7% gradients nearly 30 kilometers long.

It has been subjected to endurance tests of more than 2.5 million kilometres of on-road testing and passed aggressive cab shaker tests at Freightliner's research and development facilities.

Full scale wind tunnel tests have also made the Argosy very "slippery". The 24° windscreen deflects air upward and through the Argosy's open visor, minimising turbulence and cutting running costs.

And with a light overall tare weight allowing payloads to be maximised, the Freightliner Argosy has been designed from the wheels up to pass the ultimate test – turning a profit.

Behind you all the way.

When you buy a Freightliner, you not only get one of the very best trucks in the world. You also get the knowledge and support of Daimler AG.

The superior technology, design and production techniques available to such an experienced, global organisation are all reflected in the Argosy. These immense resources are why this truck has evolved so far, so fast.

In Australia, this parentage is also evident in the back up Freightliner owners enjoy.

With 45 Authorised Dealers across the country, help and spare parts are always close at hand - maintenance and warranty support is easy to access.

And, of course, there's our nationwide network of Freightliner dealers, whether you're in Gosford or Geraldton - or anywhere in between. Find your nearest dealer by calling 1300 323 722.

Why Daimler Truck Financial?

Daimler Truck Financial* is one of the world's largest truck financiers. As a dedicated finance provider for Freightliner Trucks, our products are specifically designed with Freightliner owners in mind. This means you benefit from tailored products, backed by our industry knowledge and experience.

As a customer, you can tailor a plan to suit your needs from our suite of financing options;

Asset-Hire Purchase

This type of finance product provides you with flexible options. Finance agreements of this type can be structured with or without a deposit.

Payments can be tailored to suit individual needs by opting for a longer term or incorporating a final balloon payment. Upon completion of the finance agreement, and following final payment, you will then have ownership of the vehicle.

Asset Loan

Asset Loan (commonly referred to as a Chattel Mortgage), is available for business use to individuals, sole traders, partnerships and companies where ownership of the vehicle at the start of the finance agreement is important.

This finance product differs from an Asset-Hire Purchase and Finance Lease in that vehicle ownership is provided for at the start of the finance agreement, in exchange for security to be taken over the vehicle. Upon completion of the finance agreement and following final payment, security over the vehicle is released.

Finance Lease

This type of finance product is a rental agreement offering fixed payments with the addition of a residual value payable at the expiry of the finance contract.

This finance product offers immediate use of the vehicle without a substantial outlay. At the end of the finance lease you can make an offer to purchase, re-lease, or upgrade to a brand new vehicle – the choice is yours. Our finance products may provide taxation advantages depending on the structure of your business*.

Our Finance Product Features

With all of our finance products you benefit from:

- Flexible Terms – 12-60 months for all new Freightliner Trucks
- Final Balloon Payment / Residual Value[^]
- Flexible deposits
- Fixed interest rates with no ongoing monthly fees - Your interest rate is fixed for the duration of the loan term
- Structured Payments – We can tailor payments to suit your cash flow requirements

Operating Lease

A Daimler Truck Financial Operating Lease can be defined as a rental agreement for the use of a vehicle supplied by Freightliner Trucks. This is a method of funding the use of a vehicle without the drawbacks and risks of ownership.

The vehicle is leased to you for a fixed period from 24-60 months. Monthly rentals are flexible based on the term and the amount of kilometres you choose at the outset, plus optional maintenance and service.

At the end of the term the vehicle is simply returned with no further financial obligation apart from any excess kilometre charges or any damage outside of fair wear and tear.

Optional inclusions to suit your individual needs:

- Full maintenance and repairs
- Non maintained
- Scheduled servicing
- Choose agreed contract kilometres

* Daimler Truck Financial is a registered business name of Mercedes-Benz Financial Services Australia Pty Ltd ACN 074 134 517 (MBFSAu). MBFSAu offers finance products for new and used vehicles (up to 8 years). All finance products offered are subject to lending conditions and standard credit assessment criteria. You should contact an authorised dealer for further details.

* MBFSAu makes no representation as to the effect of any financial product on your personal or company tax arrangements and recommends you seek independent financial, taxation and legal advice before entering into any finance agreement.

[^] Final Balloon Payment/Residual Value structure is not available on Operating Leases.
